

Non-Curing Rubberized Asphalt Waterproof Coating

- Non-Curing Rubberized Asphalt Waterproof Coating is suitable for sealing building joints, underground engineering, and repairing leaks

Polymer modified asphalt waterproof coating

- Root puncture resistant waterproofing membrane, suitable for roof greening, underground construction, and landscape engineering

Water-based 951 Colored Polyurethane Waterproof Coating

- Water-based 951 Colored Polyurethane Waterproof Coating is suitable for indoor waterproofing maintenance projects on building roofs

Elastomer-modified Asphalt Waterproofing Membrane

- Elastic modified Asphalt waterproofing Membrane type 3 polyester sand/type 3 polyester smooth surface suitable for rooftop roofs and underground engineering

Polymer-Modified Asphalt Waterproof Coating

- Polymer-Modified Asphalt Waterproof Coating is suitable for building roofs, underground engineering, bridges, and roads

Elastomer-modified Asphalt Waterproofing Membrane

- Elastomer-modified Asphalt Waterproofing Membrane Type 3 Polyester Sand / Type 3 polyester smooth surface (with packaging) suitable for rooftop roofs and underground engineering

Self-adhesive Waterproofing Membrane

- Self-adhesive Waterproofing Membrane is suitable for building roofs, basements, tunnels, and maintenance projects
